

How to view an album online:

1. From the 'view your wedding online' page, click on your couple's photo. This acts as a link and will re-direct you to the website where you can view their photos.
2. There, you will have to enter a password to view the photos. The password is the new married last name. Example: John and Christina Stewart...the password would be Stewart.
3. The album will open and you are free to browse through the photos.
4. To download a photo for printing:
 - a. Create a new folder on your computer (preferably your desktop for easy access).
 - b. Click on the "Get Original Uploaded Photo" link that is located below the photo.
 - c. The photo will open in a new window. It may take a while to load, as the photos are large files for printing.
 - d. Right click on the photo and click 'Save As'
 - e. A browser window will come up. Save the file in the folder you created on your desktop.
 - f. After you save the file, click on the 'BACK' button on your internet browser to view another photo. If you close the window, you will have to log in again.
 - g. You can then burn a CD of your folder and take it into a photo lab of your choosing.
